Alessandra Wall, PhD

Introduction

- 1** **Make better decisions by understanding bias**
Decisions are a part of your daily life and can have a lasting impact.

Overcoming Bias

- 2** **Confirmation bias**
In order to make better decisions, you must be able to evaluate the information presented to you properly.
- 3** **Hindsight bias**
Whenever we make decisions, we tend to review them and attempt to confirm it was the right decision to make.
- 4** **Better than average bias**
Did you know that most people think they're better than average, even though that's not possibly the case?
- 5** **Attribution bias**
Our beliefs are grounded in why we think things happen or have happened.
- 6** **Availability bias**
Have you ever felt like you hit more red lights when you're running late?
- 7** **Backfire bias**
When you present people with facts, they rarely change their mind.

8

Authority bias

When people take the stage, we often give them more attention.

9

Inattentional blindness bias

Experiments show we often encounter situations where we miss things happening directly in front of us.

10

Anchoring bias

Very improbable events will probably occur if the event happens enough.

11

Blind spot bias

We have a tendency to accept that other people have blind spots in their beliefs, but feel we don't.
